## Commentary

**Cash flow** The cash balance at the 30<sup>th</sup> June was £59.8m, which is £12.6m above plan.

The current financial regime has resulted in block contract payments which gives some stability and certainty to the majority of cash receipts. The trust currently has 82 days of operating cash (prior month: 81 days).

June saw a cash inflow of £1.0m against a forecast outflow of £2.8m due to higher than expected receipts for NHS provider SLA and pay award income. The cash flow forecast for the end of the financial year is showing achievement of plan and will be refined as the year progresses.

## Commentary

**Reporting** Trust efficiencies are managed and reported via the CIP Board.

**Identified Savings** The divisional reporting segment highlights the level of identified schemes by division and the corresponding risk profile for these schemes.

**In Year Delivery** The trust is reporting efficiency savings achieved of:-

- £0.26m in month, compared to a plan of £0.65m, a £0.39m adverse variance;
- £0.64m year to date, compared to a plan of £1.62m, £0.98m adverse to plan.

**Productivity** Productivity efficiency schemes represent the level of ERF activity performance in excess of the external 118% activity target, by financial weighted average income, less the estimated level of costs of delivery within clinical divisions.

- The Trust has set baseline internal activity targets of 121%+, which subject to case mix and national guidance could represent £3.0m additional income\* prior to identified marginal costs of delivery.
- Current assumption include a net £2m forecast contribution whilst activity recovery plans are assessed.

**Risk Profiles** The charts to the left demonstrates the identified saving by category, divisional identification status including risk profiles, and the Trust wide monthly risk profile changes for identified schemes as the year progresses.

**Forecast** The trust is currently forecasting to achieve £3.57m of savings against a £7.81m plan £4.23m adverse to planned efficiency levels.
